EDITOR'S NOTE

This publication is designed to provide reference data on imports to Canada. The data will be of particular interest to companies and entrepreneurs in identifying possible investment opportunities.

In no case has an attempt been made to indicate or assess the feasibility of entering or competing within a particular market. Rather, the catalogue is provided as a starting point and an aid for the conduct of more detailed market research.

This catalogue was prepared by:

Market Information and Analysis Division

For more information, please contact the Market Information and Analysis Division or the nearest DRIE regional office. These are listed on the inside back cover.

NOTE DE L'ÉDITEUR

Le présent catalogue est un recueil de données de référence sur les produits importés au Canada. Ces données seront particulièrement utiles aux sociétés et aux entrepreneurs désireux de repérer les possibilités d'investissement au pays.

En aucun cas, il n'a été question de chercher à mesurer les chances de pénétrer un marché donné ou d'y soutenir la concurrence. Le lecteur est invité à considérer ce catalogue plutôt comme un point de départ et un moyen de mener des recherches plus poussées sur les débouchés possibles.

Ce catalogue a été préparé par :

EXPLANATORY NOTES

Valuation

Imports are generally recorded at the values established for customs duty purposes according to the provisions of the Customs Act (Canadian dollars). Customs values are identical to selling prices for most arms-length transactions. However, customs values exceed selling prices for many transactions between affiliated firms.

Data Source

Statistics Canada is the source for all data included in this publication.

Average Annual Growth Rate

Growth rates are calculated on the basis of annual compounding.

NOTES EXPLICATIVES

Évaluation

En règle générale, les importations sont présentées d'après les valeurs calculées aux fins de perception des droits de douane, conformément aux dispositions de la *Loi sur les douanes* (valeurs exprimées en dollars canadiens). La valeur des droits de douane est identique au prix de vente dans le cas de la plupart des transactions sans lien de dépendance, toutefois, elle peut être supérieure au prix de vente dans le cas des transactions passées entre entreprises affiliées.

Source des données

Toutes les données présentées dans le catalogue proviennent de Statistique Canada.

Taux de croissance annuel moyen

Le taux de croissance est calculé d'après le taux annuel moyen.

PREFACE

The main purpose of this catalogue is to provide businesses, associations, industrial developers and various levels of government with selected data on imports into Canada. It is aimed at increasing awareness of the enormous potential existing in the Canadian marketplace for domestic production and at stimulating business to explore further potential market opportunities in Canada. The catalogue forms part of the federal government's domestic marketing campaign.

The publication covers approximately 89 percent of all products imported into Canada. For 1985 alone, this percentage represented a significant $91.7 billion in imports. As a general rule, all products for which imports were valued at over $3 million in 1985 appear in this catalogue. Crude products as well as some products which are highly unlikely to have potential for production in Canada (e.g., coconuts) have been omitted.

The following information is contained in the catalogue for ready reference:

- description of the product at the most detailed level given by Statistics Canada commodity codes;
- annual import quantities, where available, and dollar values for 1982-1985;
- average annual growth rate trends over the period 1982-1985;
- major foreign country of export for each product in 1985 and that country's share of the Canadian import market.

The import data are presented in four major sections to include a wide range of products: food products, fabricated materials, end products and selected commodities not elsewhere specified. A summary is included with each section.

The four sections are followed by a general key-word index of major product listings to allow the reader to locate product information by reference to the commodity code numbers.

The user is encouraged to refer to the information contained in the section entitled "Use of Catalogue" to avoid drawing erroneous conclusions from the data. In particular, it is important to emphasize that this catalogue does not attempt any assessment as to the feasibility of competing in a particular market.

Further information on import markets, such as ports of entry, additional countries of export, and any available analysis of imports, can be obtained through the principal regional offices of the Department of Regional Industrial Expansion (DRIE), listed on the inside back cover, DRIE's Market Information and Analysis Division (see below), or Statistics Canada as a primary data source.

PRÉFACE

Le catalogue présente aux entreprises, aux associations, aux promoteurs industriels et aux représentants des divers niveaux de gouvernement, des données choisies sur les produits importés au Canada. Il vise aussi à faire connaître les débouchés considérables qu'offre le marché canadien de la production intérieure et à encourager les entreprises à chercher d'éventuels débouchés au pays. Ce catalogue est publié dans le cadre du programme national de commercialisation du gouvernement fédéral.

Ce catalogue contient des données sur environ 89 p. 100 des produits importés au Canada, et dont la valeur totale, en 1985, s'élevait à 91,7 milliards de dollars. Dans l'ensemble, les catégories de produits figurent dans le catalogue lorsque les produits importés avaient, en 1985, une valeur supérieure à 3 millions de dollars. Les données concernant certaines matières brutes, ainsi que des produits dont les possibilités de production au Canada sont très minces (comme la noix de coco), ont été omises.

Pour faciliter la consultation du catalogue, les données sont présentées de la façon suivante :

- La description la plus détaillée possible des produits, d'après les codes de marchandises fournis par Statistique Canada;
- La quantité annuelle des produits importés (le cas échéant) et leur valeur en dollars pour la période allant de 1982 à 1985;
- L'évolution du taux de croissance annuel moyen de 1982 à 1985;
- Le principal pays exportateur pour chaque produit importé en 1985, et une indication de la part du marché canadien des importations occupée par ce pays.

Les données sur les produits importés sont réparties en quatre grandes catégories regroupant une vaste gamme de produits : les aliments, les matières travaillées, les produits finis et les autres produits choisis. Chaque partie comporte un résumé.

Ces quatre parties sont suivies d'un index alphabétique général des grandes catégories de produits, pour permettre au lecteur de trouver facilement des renseignements sur un produit donné, classé selon le code des marchandises.

Le lecteur est vivement encouragé à consulter la section intitulée *Comment se servir du catalogue* pour éviter de tirer des conclusions erronées à partir des données. Il convient de souligner que ce catalogue ne vise nullement à évaluer la possibilité de soutenir la concurrence sur un marché donné.

Pour obtenir de plus amples renseignements sur les marchés d'importation (notamment le point d'entrée, les pays exportateurs, et les résultats d'analyses des importations etc.), veuillez vous adresser aux bureaux régionaux

To encourage continued development and expansion of the domestic market, a published series of Import Profiles, based on import trends of individual commodities, is also produced. The profiles highlight those products with a major potential for development or production in Canada (see Related Services, page ix).

Special thanks are due to the International Trade Division of Statistics Canada for assistance in preparing the data sections for the catalogue. Readers are invited to make comments and suggestions by writing to:

du MEIR (voir la liste donnée en fin de catalogue au plat inférieur), à la Division des analyses et de l'information sur les marchés du MEIR, ou à Statistique Canada, principale source des données.

Afin d'encourager l'exploitation et l'expansion soutenues du marché intérieur, le MEIR a publié une série de documents traçant le profil des importations de certains produits.

LE PROFIL DES IMPORTATIONS présente des produits dont les chances de fabrication ou de production au Canada sont très grandes (consulter la section intitulée *Autres services*, p. ix).

Nous tenons à remercier tout particulièrement la Division du commerce international de Statistique Canada de son aide, lors de la compilation des données à inclure dans le présent catalogue. Le lecteur est invité à faire part de ses observations et de ses suggestions en s'adressant au :

USE OF CATALOGUE

General

The catalogue may be used in various ways depending on the recipient:

- Manufacturers may ascertain the level of imports within their product lines or find complementary products to expand their markets;
- Entrepreneurs may find new opportunities for investment;
- Industrial developers may assist clients and encourage investment in Canada.

For example, if you were a puzzle manufacturer, you could use the catalogue to determine the level of puzzle imports. To do this you would first consult the index (page 629). Space limitations permit the index to list only major product groups. For this reason, a more encompassing term, such as "games" or "toys", is used in the index rather than "puzzles". The index then refers to commodity group code 837 "Games, toys and children's vehicles" (for explanation of classification codes see "Commodity Classification" below). By turning to code 837 (page 547) and scanning through this family of like products, you find "puzzles". You could also use the catalogue to review similar or complementary products (e.g., "board games") which may represent new opportunities for expansion.

Commodity Classification

Commodity statistics in this publication are shown in terms of the 1978 edition of the *Canadian International Trade Classification (CITC) Reference Manual* (Statistics Canada Catalogue No. 65-502E).

The classification is organized at three levels. At the three-digit level, commodities are shown in major groups. The five-digit level includes headings generally describing a family of like commodities. Finally at the seven-digit level, specific products are identified. An example is illustrated as follows:

Three-Digit Commodity Code:

837 Games, toys and children's vehicles

Five-Digit Commodity Code:

83709 Games and entertainment equipment, not elsewhere specified (nes)

Seven-Digit Commodity Code:

83709-20 Bingo sets and equipment
83709-30 Games, boards and sets
83709-35 Chess sets including chess-men
83709-40 Games, paper
83709-50 Puzzles
83709-60 Dartboards and darts
83709-70 Handicraft or hobbycraft kits
83709-80 Chips, poker

COMMENT SE SERVIR DU CATALOGUE

Généralités

Ce catalogue, qui peut servir à plusieurs fins selon ce que vous y cherchez, est destiné avant tout :

- au fabricant, désireux de connaître le niveau des importations dans sa gamme de produits ou de trouver des produits complémentaires dans le but d'accroître sa part du marché;
- à l'entrepreneur, à la recherche de nouveaux débouchés ou d'investissements;
- au promoteur industriel voulant aider ses clients et encourager les investissements au Canada.

Supposons que vous fabriquez des casse-tête et que vous voulez, à l'aide du catalogue connaître la quantité de casse-tête importée au Canada. Consultez d'abord l'index (p. 629). En raison du manque d'espace, seules les grandes catégories de produits ont été énumérées, voilà pourquoi un terme assez général (comme « jeux » ou « jouets ») figure dans l'index, plutôt qu'un terme assez spécifique comme « casse-tête ». L'index renvoie au groupe de marchandises 837 « Jeux, jouets et véhicules pour enfants » (une explication des codes de classification est donnée au paragraphe *Classification des produits*). En allant à la page où se trouve le groupe de marchandises 837 (p. 547), on y trouve les « casse-tête ». Le catalogue permet aussi de trouver des produits similaires ou complémentaires (comme les « tableaux ») susceptibles de devenir de nouveaux débouchés.

Classification des marchandises

Les statistiques sur les marchandises contenues dans le catalogue sont classées d'après l'édition de 1978 du manuel de référence intitulé *Nomenclature canadienne pour le commerce international des marchandises (NCCI) (publication nº 65-502F au catalogue de Statistique Canada)*.

Cette classification en trois groupes s'explique ainsi : la classification à trois chiffres, qui correspond aux groupes de marchandises; la classification à cinq chiffres, qui s'applique aux gammes de produits de même nature, et la classification à sept chiffres, où l'on trouve les produits proprement dits. En voici un exemple :

Code de grcupe de marchandises à trois chiffres

837 Jeux, jouets et véhicules pour enfants

Code de groupe de marchandises à cinq chiffres

83709 Jeux et accessoires de divertissement non désignés ailleurs (NDA)

Code de groupe de marchandises à sept chiffres

83709-20 Jeux et matériel de bingo
83709-30 Tableaux et accessoires pour jeux divers
83709-35 Jeux d'échecs et pièces
83709-40 Découpages et autres jeux en papier
83709-50 Puzzles (casse-tête)

83709-85 Games, TV, excluding coin operated
83709-90 Games and entertainment equipment, not elsewhere specified (nes)

Problem Cases

If, after reviewing the index and scanning the catalogue you are unable to find a particular product, possible reasons may include:

- The product has been eliminated. Because of practical limitations on physical size of the catalogue, some products have been eliminated. Imports of live animals, crude products and certain products (mostly in the food section) which, for obvious reasons, cannot be substituted (e.g., coconuts) have been excluded.
- Imports were valued at less than $3 million. Import data for all family codes (five-digit level) are listed. However, at the seven-digit level, only products with imports valued at $3 million or more are listed. In the example above, poker chips 83709-80 are not in the catalogue since the import value is below this threshold.
- The product does not have a class by itself and is included in a more encompassing class. For example, checker sets are included in "Games, boards and sets" (83709-30). Other products may be assigned to residual classes. For example, "Games and entertainment equipment, not elsewhere specified" (83709-90) includes all products that do not correspond to the other 10 classes of the family. To economize space, these residual classes are summarized in section 4.

83709-60 Jeux de fléchettes et cibles
83709-70 Nécessaires pour travaux manuels ou passe-temps
83709-80 Jetons de poker
83709-85 Jeux, appareils de télévision, sauf payants
83709-90 Jeux et matériel de divertissement NDA

Cas particuliers

Il se peut qu'après avoir consulté l'index et le catalogue, l'on ne trouve pas un produit donné et ce pour plusieurs raisons :

- Le produit a été supprimé. En raison du format du catalogue, il arrive que des produits sont supprimés. Ajoutons que le catalogue ne contient pas de données sur les animaux vivants importés, les produits bruts importés et certains produits qui ne peuvent manifestement pas être remplacés (il s'agit surtout de produits alimentaires, comme la noix de coco).
- La valeur totale des importations pour certains produits était inférieure à 3 millions de dollars. Il existe des données inscrites pour les produits importés de toutes les gammes (codes de cinq chiffres), mais, dans le cas des produits identifiés par un code de sept chiffres, seuls les produits dont la valeur des importations dépasse 3 millions de dollars ont été inscrits. Dans l'exemple donné à la page précédente, les jetons de poker (code 83709-80) ne sont pas mentionnés dans le catalogue parce que la valeur des importations n'atteignait pas 3 millions de dollars.
- Le produit cherché ne constitue pas un groupe en soi, il a donc été inclus dans un groupe plus général. Par exemple, les jeux de dames sont inclus dans le groupe « Tableaux et accessoires pour jeux divers » (code 83709-30). Il se peut aussi que d'autres produits aient été classés dans d'autres groupes. Par exemple, le groupe « Jeux et matériel de divertissement NDA » (code 83709-90) comprend tous les produits qui ne correspondent pas à la définition des autres groupes de la catégorie. En raison du manque d'espace, la liste de ces autres groupes se trouve à la Partie 4.

RELATED SERVICES

This catalogue is only a first step in identifying market opportunities. Decision makers will require more in-depth market research to assess feasibility of producing a product in Canada. The Department of Regional Industrial Expansion offers services that may assist you in your market research. Two such services are Import Profiles and Import Analyses.

Import Profiles

An IMPORT PROFILE may be a logical follow-on step to the identification of an investment opportunity in the Market Opportunities Catalogue. Manufacturers wanting to expand, entrepreneurs looking for a manufacturing opportunity, or industrial developers seeking to attract new investments make regular use of IMPORT PROFILES.

IMPORT PROFILES are brief, published reports providing a snapshot of import trends and market information, on a particular product or product group, over a four-year period.

IMPORT PROFILES provide a variety of information not readily available from other sources, including:

- annual changes and trends in imports;
- number of importers, by region and type (wholesaler, retailer or manufacturer);
- market share of top importers;
- main countries of export;
- unit prices of imports;
- Canadian tariffs (current and scheduled);
- Canadian production;
- Canadian exports;
- Canadian government procurement;
- market summary;
- names of importers.

As a general rule, the profiled products correspond to the commodity codes of the Canadian International Trade Classification (CITC). However, the information listed above is not always available.

Requests for new IMPORT PROFILES are assessed on the basis of technical feasibility and market opportunity.

Import Analyses

For manufacturers in the advanced stages of planning for product development, new investment, or market expansion, an IMPORT ANALYSIS may be a useful aid to market research.

IMPORT ANALYSES are published reports containing import data for individual products over a specific time period and in significantly greater detail than that available from Statistics Canada publications. The data are compiled from individual import documents and tabulated to preserve confidentiality.

AUTRES SERVICES

Ce catalogue est un moyen parmi tant d'autres de repérer des débouchés. Avant de prendre des décisions, il faut sonder en profondeur le marché pour déterminer s'il est possible de fabriquer un produit au Canada. Le MEIR met à la disposition de tout entrepreneur divers moyens afin de faciliter ces recherches, entre autres *LE PROFIL DES IMPORTATIONS* et *L'ANALYSE DES IMPORTATIONS*.

Profil des importations

Une fois les débouchés repérés dans le catalogue des possibilités du marché canadien, l'étude du document *LE PROFIL DES IMPORTATIONS* en est la suite logique. Les fabricants désireux d'étendre leurs activités, les entrepreneurs à la recherche de possibilités de fabrication et les promoteurs industriels à la recherche de nouveaux investissements consultent régulièrement la série *LE PROFIL DES IMPORTATIONS*.

Cette série se compose de brefs rapports donnant un aperçu de l'évolution des importations et de l'information sur les débouchés d'un produit ou d'un groupe de produits pour une période de quatre ans.

LE PROFIL DES IMPORTATIONS contient des données qu'il est souvent difficile d'obtenir auprès d'autres sources; ces données portent, entre autres, sur :

- l'évolution et les variations annuelles des importations;
- le nombre d'importateurs par région et par type (grossistes, détaillants ou fabricants);
- la répartition du marché entre les principaux importateurs;
- les principaux pays exportateurs;
- le prix unitaire des produits importés;
- les tarifs canadiens (actuels et prévus);
- la production canadienne;
- les exportations canadiennes;
- les achats du gouvernement canadien;
- un résumé du marché;
- les noms des importateurs.

Dans l'ensemble, les produits décrits dans cette série correspondent aux produits visés par les codes de la *Nomenclature canadienne pour le commerce international des marchandises (NCCI)*. Toutefois, les données énumérées au paragraphe précédent ne sont pas toujours toutes disponibles.

Toute demande en vue de tracer *LE PROFIL DES IMPORTATIONS* pour un produit donné est évaluée en fonction de la faisabilité technique et des débouchés commerciaux.

IMPORT ANALYSES contents are developed in close consultation with the client company, and carefully tailored to its requirements. A typical report can include:

- product breakdown by:
  - type,
  - size,
  - material,
  - price range;
- value and quantity of imports;
- main countries of origin;
- ports of entry;
- market share of top importers;
- names of major foreign exporters;
- names of importers;
- Canadian tariffs (current and scheduled);
- market summary.

All the information listed above is not always available. The data published depend on the level of detail contained in the documents accompanying shipments into Canada, and on established confidentiality regulations.

Over the last five years, some 170 clients have used this service to assist in market planning and development activities. IMPORT ANALYSES have contributed, over this period, to the establishment or maintenance of about 5000 jobs and new investments of $500 million. Requests for this service are assessed in light of the potential for positive impact on the economy and technical feasibility.

Obtaining Analyses and Profiles

A complete list of IMPORT ANALYSES and IMPORT PROFILES published to date and copies of analyses and profiles of particular interest to you are available from the Market Information and Analysis Division or the nearest Department of Regional Industrial Expansion regional office. The division may also be able to help you with import information in other ways. These services are provided at no charge.

Analyse des importations

Pour les fabricants qui en sont aux dernières étapes de la planification de nouveaux produits, de nouveaux investissements ou de l'extension de leur marché, *L'ANALYSE DES IMPORTATIONS* peut étayer leur analyse du marché.

L'ANALYSE DES IMPORTATIONS est un recueil des données sur les divers produits importés au cours d'une certaine période. Ces données, beaucoup plus détaillées que celles que l'on trouve dans les publications de Statistique Canada, proviennent de divers documents sur les importations et sont présentées sous forme de tableaux pour en respecter le caractère confidentiel.

Le contenu de *L'ANALYSE DES IMPORTATIONS*, préparé en collaboration avec l'entreprise cliente, est établi en fonction de ses besoins. *L'ANALYSE DES IMPORTATIONS* comprend normalement les éléments suivants :

- la répartition du produit selon :
  - le type,
  - les dimensions,
  - les matières premières,
  - la gamme de prix;
- la valeur et la quantité des produits importés;
- les principaux pays d'origine;
- les ports d'entrée;
- la répartition du marché entre les principaux exportateurs;
- les noms des principaux exportateurs;
- les noms des importateurs;
- les tarifs canadiens (actuels et prévus);
- un résumé du marché.

Cette publication ne renferme pas toujours tous les renseignements mentionnés ci-dessus. La nature des données publiées dépend du degré de précision des renseignements contenus dans les bordereaux d'expédition des produits au Canada, ainsi que des règlements sur la protection des renseignements confidentiels.

Au cours des cinq dernières années, quelque 170 clients ont eu recours à *L'ANALYSE DES IMPORTATIONS* pour amorcer la planification et l'expansion de leurs marchés. Au cours de la même période, *L'ANALYSE DES IMPORTATIONS* a contribué à la création ou au maintien d'environ 5 000 emplois et à l'injection d'environ 500 millions de dollars dans l'économie canadienne. Toute demande d'étude en vue d'une analyse des importations est évaluée en fonction de la faisabilité technique et de la portée éventuelle du produit sur l'économie.

Section 4

Selected Commodities — Not Elsewhere Specified

Summary

In an effort to economize space, all products for which the seven-digit reading did not provide greater product specification than the five-digit reading are listed in this section.

Example:

83709 Games and Entertainment Equipment, Not Elsewhere Specified
83709-90 Games and Entertainment Equipment, Not Elsewhere Specified

Partie 4

Produits choisis, non dénommés ailleurs

Résumé

En raison du manque d'espace, cette partie présente la liste de tous les produits dont le code de sept chiffres ne donne pas de renseignements plus précis sur le produit que le code de cinq chiffres.

Exemple:

83709 Jeux et accessoires de divertissement non dénommés ailleurs
83709-90 Jeux et matériel de divertissement non dénommés ailleurs

GENERAL KEY-WORD INDEX

This is an index of the major products found in this catalogue. As explained in "Use of Catalogue" (page vii), the commodity code is organized in three levels: three-digit, five-digit and seven-digit, each level becoming more specific. All major groups (three-digit) are listed and cross-referenced. Most families of commodities (five-digit) are listed, however they have not been cross-referenced.

For example, "Games, toys and children's vehicles" (837) and "Games and entertainment equipment not elsewhere specified" (83709) would both be found in this index and indicated as being within the commodity group code (837). However, "puzzles" (83709-50) would not be found in the index since it is very specific. To find it, one would have to look for a more general term such as "games" in the index, and scan through code 837 until the desired product is found.

A more complete index may be found in the *Canadian International Trade Classification Reference Manual* (Statistics Canada Catalogue No. 65-502E).

INDEX ALPHABÉTIQUE GÉNÉRAL

Il s'agit de l'index des principaux produits énumérés dans le catalogue. Comme il a déjà été expliqué à la section *Comment se servir du catalogue* (p. vii), les codes des marchandises ont été subdivisés en trois groupes (trois chiffres, cinq chiffres et sept chiffres), chacun étant plus précis que le précédent. Les codes des grandes catégories de marchandises (les codes à trois chiffres) ont été indiqués, et un système de renvois a été établi entre eux. La plupart des codes des gammes de produits (les codes à cinq chiffres) sont donnés, mais il n'existe aucun système de renvoi pour ce groupe.

Par exemple, les groupes *Jeux, jouets et véhicules pour enfants* (code 837) et *Jeux et accessoires de divertissement NDA* (code 83709) sont classés dans la catégorie de produits 837; toutefois, le groupe « Casse-tête », très précis, ne figure pas à l'index. Pour le trouver, il faut plutôt se reporter à un terme plus général (comme « jeux ») et poursuivre les recherches dans la catégorie 837 jusqu'à ce qu'on repère le produit voulu.

Un index plus complet se trouve dans le manuel de référence intitulé *Nomenclature canadienne pour le commerce international des marchandises* (NCCI) (publication nº 65-502F au catalogue de Statistique Canada).
